BUILT FOR WHAT'S NEXT

The new Thompson Center was built to increase access, expand services, and serve more families across Missouri and beyond. Although clinical operations began in the new building in March 2026, the Thompson Center team delivered significant growth throughout FY26—demonstrating both the urgency of the need and the power of investing in what comes next.

All figures represent FY26. Percentage increases reflect growth compared with FY25.

21,309
PATIENT VISITS
19% increase

5,532
DISTINCT PATIENTS
22% increase

974
AUTISM EVALUATIONS
32% increase

4,079
TELEHEALTH VISITS
73% increase

111
MISSOURI COUNTIES SERVED

22
OUT-OF-STATE COUNTIES SERVED

MORE ACCESS, LESS BURDEN

Through telehealth, Missouri families avoided 515,000 miles of travel.

RESEARCH

$4.4 MILLION
RESEARCH GRANTS AND STATE CONTRACTS

11
ACTIVE RESEARCH PROJECTS

2,020
EDUCATORS

1,122
INDIVIDUALS ACROSS 32 AUTISM FRIENDLY BUSINESSES

219
STUDENTS THROUGH 3900+ SUPERVISION HOURS

INTENSIVE OUTPATIENT PROGRAM

FIRST OF ITS KIND IN MISSOURI | MULTIDISCIPLINARY | COMPREHENSIVE

Now open and already serving families, the Intensive Outpatient Program (IOP) provides compassionate, multidisciplinary care for children ages 3–19 with autism or intellectual disabilities who are stepping down from, or at risk for, a hospital stay. Offering intensive therapy five days a week alongside coordinated family support, the IOP fills a critical gap between outpatient and inpatient services, a level of care that doesn't exist anywhere else in Missouri.

For years, therapy was something my son feared. He never wanted to go, and it broke my heart because I knew he needed it so badly. But now, with the Thompson Center, it's completely different. For the first time, he's happy to go. He feels safe, he feels understood, and I can see how much he's growing; not just in skills, but in trust." — **MOTHER OF IOP PATIENT**
